Exploring grief, belonging, and the relationships that shape who we become.

June Moore is a writer, educator, speaker, and graduate student in Clinical Mental Health Counseling at Southwestern College, Santa Fe, New Mexico (M.A., expected 2028). With an M.A. in Organizational Psychology from Antioch University Seattle and more than a decade of experience facilitating groups, supporting adult learning, and fostering psychologically safe environments, her work bridges lived experience with clinical training, interdisciplinary research, and a deep commitment to understanding how people heal.

June is the founder of Healing the Parent Wound, an integrative healing and recovery model for adults navigating parental estrangement, attachment injury, and complex family relationships. Her writing and speaking explore grief, ambiguous loss, identity, belonging, intergenerational patterns, and wholeness — drawing from attachment theory, trauma neurobiology, Internal Family Systems, somatic awareness, decolonial thought, and relational healing.

AREAS OF FOCUS

Grief & Ambiguous Loss • Family Estrangement • Belonging & Identity • Trauma-Informed Healing • Intergenerational Patterns • Ritual & Meaning-Making

Topics & Presentations

01

Not Everything We Need to Grieve Has Died

An exploration of ambiguous loss, the grief of estrangement, and what happens when loss exists without death. How do we mourn what we cannot name? How do we hold grief that others cannot see?

03

Wholeness Is Not Recovery — It Is Re-Membering

Drawing from Gloria Anzaldúa's *Coyolxauhqui* Imperative, attachment theory, and lived experience, this talk reframes fragmentation not as pathology but as a space from which integration can emerge.

02

Healing the Parent Wound

Understanding how parental estrangement, the relational trauma of chronic emotional unavailability, and attachment injury shape adult identity, relationships, and emotional well-being — and what it means to begin healing.

04

The Stories We Look For Shape the Stories We Find

How narrative frameworks influence healing. Moving beyond deficit-based storytelling to hold suffering alongside resilience, beauty, and growth — without erasing either.

Custom topics and workshops available. June welcomes collaborative conversations about the needs of your audience.

Selected Work

Healing the Parent Wound

FOUNDER • ONGOING

Developing an integrative healing and recovery model for adults navigating parental estrangement and attachment injury. Designed a women's retreat, two-day psychoeducational curriculum, and three-month group coaching program integrating reflection, expressive arts, contemplative practices, and somatic wellness.

A Call to Men — Behavioral Research

CONSULTANT • 2024

Produced five in-depth strategic reports on Gen Z male mental health, online radicalization, and digital culture for a nationally recognized violence prevention organization. Research informed public-facing educational resources for parents and caregivers.

ACLU of Idaho — SOMOS Aliados

LEADERSHIP COHORT • 2026–PRESENT

Participating in an immersive community-based leadership program focused on immigrant justice, storytelling as activism, and cross-cultural solidarity. Deepening commitment to culturally responsive, justice-oriented practice.

M.A. CLINICAL MENTAL HEALTH COUNSELING (IN PROGRESS) • M.A. ORGANIZATIONAL PSYCHOLOGY • 10+ YEARS GROUP FACILITATION • TRAUMA RESEARCH FOUNDATION TRAINED
